CHAPTER 29: NEOPLASMS

Exercise 29.1

1. C18.4 Transverse colon  c
2. D44.10 Adrenal gland  d
3. C43.0 Lip  c
4. D02.1 Trachea  b
5. D49.4 Bladder  e
6. D10.6 Nasopharynx  a
7. C7a.025 Sigmoid colon  c

Exercise 29.2

1. Morphology of neoplasms refers to the study of the form and structure of the tissue and cells from which the neoplasm arises.  T

2. Metastatic neoplasms can be identified by their morphology, which is identical to the morphology of the surrounding normal tissue and cells at the metastatic site.  F

3. Coders may use the completed cancer staging form for coding purposes when it is authenticated by the attending physician.  T

Exercise 29.3

1. Bronchial adenoma  D38.1

2. Burkitt's lymphoma of intrapelvic lymph nodes  C83.76

3. Lipoma of head  D17.0

4. Hairy cell leukemia in remission  C91.41

5. Endometrial sarcoma  C54.1

6. Hodgkin's sarcoma  C81.90
**Exercise 29.4.**

1. **Carcinoma** of upper and middle third of esophagus

2. **Carcinoma** of oral cavity and pharynx

3. **Adenocarcinoma** of rectum and anus

**Exercise 29.5 (numbers 1-12)**

1. Metastatic carcinoma of right lung

2. Metastatic carcinoma to brain

3. Metastatic carcinoma from prostate to pelvic bone

   Previous prostatectomy
   History

4. Metastatic carcinoma to brain from lung

   Previous resection of lung with no recurrence at primary site
   History

5. Metastatic carcinoma from prostate to pelvic bone

6. Metastatic carcinoma of brain and lung

7. Metastatic carcinoma of pancreas and omentum

8. Metastatic adenocarcinoma of transverse colon

**Exercise 29.6 (numbers 1-5)**

1. Aleukemic myeloid leukemia, in remission                                | C92.Z1      |
2. Reticulum cell sarcoma of the spleen                                     | C83.37      |
3. Sarcoma, reticulum cell, intrathoracic                                   | C83.32      |
4. Intrapelvic Hodgkin's granuloma                                           | C81.96      |
5. Chronic myeloid leukemia                                                  | C92.10      |

**Exercise 29.7.**

1. The recurrence of an original primary malignant neoplasm that was previously removed is classified to category Z85, Personal history of malignant neoplasm. F
2. If a primary malignant neoplasm was excised previously and the original primary site has not recurred, assign the code for the previous primary malignant neoplasm, using the appropriate code from categories C00 through D49. F
3. Whenever secondary neoplasms are present, the Z code for identifying personal history of malignant neoplasm can never be sequenced as the principal diagnosis code for Uniform Hospital Discharge Data Set purposes. T
**Exercise 29.8 (numbers 1-8)**

1. **Infiltrating** papillary transitional cell carcinoma of urinary bladder (neck)  
   Percutaneous **excision** of bladder neck tumor  
   C67.5  
   0TBC3ZZ

2. **Carcinoma** of midesophagus with spread to celiac lymph nodes  
   C15.4  
   C77.2  
   Permanent **gastrostomy** procedure, percutaneous approach with synthetic substitute  
   Radiotherapy to esophagus using photons 1-10 MeV  
   DD001ZZ

3. Malignant **carcinoid** tumor of small intestine  
   C7A.019

4. **Carcinoma**, scirrhous, female left breast, outer portion  
   C50.812  
   Open **biopsy** with frozen section followed immediately by left radical mastectomy  
   (resection of left breast, left axillary lymph nodes and pectoral muscle)

   0KTJ0ZZ  
   0HBU0ZX

5. Intramural **leiomyoma** of uterus  
   D25.1

6. Multiple **myeloma**  
   C90.00

7. **Carcinoma** of gallbladder with metastasis to abdominal lymph nodes and liver and peritoneal implants  
   C23  
   C77.2  
   C78.7  
   C78.6  
   Exploratory laparotomy with **cholecystectomy**, needle biopsy of peritoneal implant, and intra-operative electron radiation therapy abdominal lymph nodes  
   0FT40ZZ  
   0DBW3ZX  
   D7063Z0

8. Squamous cell **carcinoma** in situ, floor of mouth  
   **Resection** of lesion, floor of mouth (mucosa)  
   D00.06  
   0CB4XZZ
