CHAPTER 29: NEOPLASMS

Exercise 29.1

1. C18.4 Transverse colon  
2. D44.10 Adrenal gland  
3. C43.0 Lip  
4. D02.1 Trachea  
5. D49.4 Bladder  
6. D10.6 Nasopharynx  
7. C7A.025 Sigmoid colon

e

Exercise 29.2

1. Morphology of neoplasms refers to the study of the form and structure of the tissue and cells from which the neoplasm arises.  
2. Metastatic neoplasms can be identified by their morphology, which is identical to the morphology of the surrounding normal tissue and cells at the metastatic site.  
3. Coders may use the completed cancer staging form for coding purposes when it is authenticated by the attending physician.

Exercise 29.3

1. Bronchial adenoma  
2. Burkitt's lymphoma of intrapelvic lymph nodes  
3. Lipoma of head  
4. Hairy cell leukemia in remission  
5. Endometrial sarcoma  
6. Hodgkin's sarcoma
Exercise 29.4.

1. Carcinoma of upper and middle third of esophagus  
   C15.8

2. Carcinoma of oral cavity and pharynx  
   C14.8

3. Adenocarcinoma of rectum and anus  
   C21.8

Exercise 29.5 (numbers 1-12)

1. Metastatic carcinoma of right lung  
   C34.91
   C79.9

2. Metastatic carcinoma to brain  
   C79.31
   C80.1

3. Metastatic carcinoma from prostate to pelvic bone  
   C79.51
   Z85.46

   Previous prostatectomy
   History

4. Metastatic carcinoma to brain from lung  
   C79.31
   Z85.118

   Previous resection of lung with no recurrence at primary site
   History

5. Metastatic carcinoma from prostate to pelvic bone  
   C61
   C79.51

6. Metastatic carcinoma of brain and lung  
   C79.31
   C78.00
   C80.1

7. Metastatic carcinoma of pancreas and omentum  
   C78.89
   C78.6
   C80.1

8. Metastatic adenocarcinoma of transverse colon  
   C18.4
   C79.9
9. Metastatic carcinoma of bronchus
   -
   -
   -
   -

10. Metastatic carcinoma of spinal cord
    -
    -
    -
    -

11. Metastatic carcinoma of femur
    -
    -
    -
    -

12. Metastatic carcinoma of brain
    -
    -
    -
    -

Exercise 29.6 (numbers 1-5)

1. Aleukemic myeloid leukemia, in remission
   C92.Z1

2. Reticulum cell sarcoma of the spleen
   C83.37

3. Sarcoma, reticulum cell, intrathoracic
   C83.32

4. Intrapelvic Hodgkin's granuloma
   C81.96

5. Chronic myeloid leukemia
   C92.10

Exercise 29.7.

1. The recurrence of an original primary malignant neoplasm that was previously removed is classified to category Z85, Personal history of malignant neoplasm.

2. If a primary malignant neoplasm was excised previously and the original primary site has not recurred, assign the code for the previous primary malignant neoplasm, using the appropriate code from categories C00 through D49

3. Whenever secondary neoplasms are present, the Z code for identifying personal history of malignant neoplasm can never be sequenced as the principal diagnosis code for Uniform Hospital Discharge Data Set purposes.
Exercise 29.8 (numbers 1-8)

1. **Infiltrating** papillary transitional cell carcinoma of urinary bladder (neck)  C67.5  
   Percutaneous **excision** of bladder neck tumor  0TBC3ZZ

2. **Carcinoma** of midesophagus with spread to celiac lymph nodes  C15.4  C77.2  
   Permanent **gastrostomy** procedure, percutaneous approach with synthetic substitute  0D163J4  
   **Radiotherapy** to esophagus using photons 1-10 MeV  DD001ZZ

3. Malignant **carcinoïd** tumor of small intestine  C7A.019  
   Endoscopic **excision** of tumor of small intestine  0DB88ZZ

4. **Carcinoma**, scirrhous, female left breast, outer portion  C50.812  
   Open **biopsy** with frozen section followed immediately by left radical **mastectomy**  0HTU0ZZ  07T60ZZ  
   (resection of left breast, left axillary lymph nodes and pectoral muscle)  0KTJ0ZZ  0HBU0ZX

5. Intramural **leiomyoma** of uterus  D25.1  
   Total vaginal hysterectomy  0UT97ZZ  0UTC7ZZ

6. Multiple **myeloma**  C90.00

7. **Carcinoma** of gallbladder with metastasis to abdominal lymph nodes and liver and peritoneal implants  C23  C77.2  C78.7  C78.6  
   Exploratory laparotomy with **cholecystectomy**, needle biopsy of peritoneal implant, and intra-operative electron **radiation** therapy abdominal lymph nodes  0FT40ZZ  0DBW3ZX  D7063Z0

8. Squamous cell **carcinoma** in situ, floor of mouth  D00.06  
   **Resection** of lesion, floor of mouth (mucosa)  0CB4XZZ
